

Novelties Come from WUKO!

WUKO

WUKO Uber Bender

Equipped with an angled bending disc for bending up to 100°

- avoid potential scratches to the underlying surface
- demands less space when forming male and female profiles
- offers wider application than other tools

The ideal tool for delicate materials, spring back materials and bending along longitudinal beadings.

WUKO Uber Bender 6200

Bending height: 5–200 mm (0.2–8 in)

WUKO Uber Bender 6350

Bending height: 5–350 mm (0.2–14 in)

WUKO Uber Bender Duo

The double version for long panels!

Equipped with a second pair of angled bending discs and a handle for quick and easy bending of long, straight panels. Delivered in a carrying case.

WUKO Uber Bender Duo 7200

Bending height: 5–200 mm (0.2–8 in)

WUKO Uber Bender Duo 7350

Bending height: 5–350 mm (0.2–14 in)

WUKO Hem Bender 8200

From 0 to 180° in a single tool!

Equipped with two pairs of bending discs and a handle.

- Quick and easy bending of long, straight sheet metal panels up to a height of 200 mm (8 in)
- and for creating hems [up to 14 mm (½ in)]
- Demands less space and offers wide range of applications

Delivered in a carrying case.

WUKO Combo Bender 5000

Handy tool for beading, stiffening and offsetting of sheet metal.

- Four roller stops for easier guidance on straight sheet metal strips
- Quick and easy removal of two roller stops for working on curves
- Adjustable throat depth from 0 to 65 mm (2.5 in)
- Lower shaft radially adjustable (forming pressure increase)
- Roll sets made of hardened steel and equipped with long-life bearings
- Interchangeable roll sets (special roll sets on demand)
